Made with American Birchwood Xylitol,
pure essential oils and organic flavors!

*Xylitol is an approved FDA sugar substitute

What is Xylitol?

Xylitol is a natural occurring sweetener found in the fibers of many fruits and vegetables. It is even found in small amounts in the human body. One teaspoon of Xylitol contains 40% less calories than sugar and it is not utilized via the same insulin pathways as sugar. Because of the slow absorption rate, the metabolic capacity is never exceeded when Xylitol is administered by mouth.

How is Xylitol different?

Our Xylitol is processed from Birchwood, right here in the USA. **NOT** made with GMO corn from outside the country.

When to use Xylitol

Sucking on Xylitol **ICE CHIPS** 3-5 times per day is recommended for maximum benefit. Ideally, use immediately after a meal or snack. Expectant mothers may use **ICE CHIPS**. Recent studies have found a link between consuming Xylitol during pregnancy and stronger teeth in infants.
